Lou? Can we just respond and direct him to other finalized federal assessments?

Subject: Regarding the IRIS Toxicological Review of Formaldehyde (Inhalation) (External Review Draft 2010)

Hello,

My name is Roberto French, I am a current senior undergraduate student studying Environmental Public Health at the Ohio State University. I am attempting to write, and potentially publish, a research thesis as a part of my honors final capstone experience. I am researching the non-cancer health effects of formaldehyde present in embalming fluid as it pertains to gross anatomy laboratories, this led me to trying to find an inhalation RfC for formaldehyde, which was not present on the IRIS Chemical Database. Upon doing some further research, I came across the IRIS Toxicological Review of Formaldehyde (Inhalation) (External Review Draft 2010) which provided a number of potential inhalation RfCs, I have attached that same draft document to this email. As this document is a draft however, it cannot be cited, and so I'm a little stuck as to where to progress regarding finding an inhalation RfC for formaldehyde. I am emailing you to ask if there is any help you may provide me with in regards to this problem, any and all help would be greatly appreciated.

Thank you,
Roberto French
